CAST IRON STOVE

Efficient, Beautiful Heat Without the Mess of Wood Burning

FMI Vent-Free Cast Iron Stoves bring you the old world charm of a wood burning stove combined with the economy, convenience, comfort and efficiency of gas space heat. These beautiful appliances eliminate the mess and inconvenience of heating with wood.

Just select any one of our four color choices to enhance your decor and provide an economical way to reduce the expensive operating cost of central heating. Plus heating with a FMI Stove means you'll never be left in the cold with wet logs or without heat during an electrical power outage.

You will enjoy the realism and beauty of the dual burner systems that feature realistic logs, an abundance of dancing yellow flames. All FMI Burner Systems feature remote ready controls and a "matchless" piezo ignition system.

FMI Remote Control Ready Burner Systems offer you two types of remote controls as well as the ability to operate the log heater with a built-in variable manual control.

Remote control accessories are optional and include a hand held on/off or thermostat remote control. The thermostat remote control allows you to operate the burner system manually (on/off) or automatically in the thermostat mode.

A FMI Vent-Free Stove delivers up to 35,000 Btu of clean, quiet, odorless heat... enough to warm up to 1,000 square feet for only pennies an hour. With the 99.9% heating efficient design, the burner system requires no venting so there is no heat loss.

FMI Cast Iron Stoves offer a sleek presentation with an opening front, curved aquare legs and raised detailing. Several popular decor colors to choose from: Flat Black, Natural Iron, Aged Silver & Antique White.

Flat Black - CISB

Natural Iron - CISNI

Aged Silver - CISAS

Antique White - CISAW

Cast Iron Stove in Aged Silver

Vent-Free Cast Iron Stove Product Offering
